

CORE CURRICULUM TESTS

Teacher/Administrator Report

The Focus-On Report gives you a list of all questions missed by each student in your class.

The Focus-On Report shows which questions your students answered incorrectly the last time the questions were presented to them.

The report shows which students need the most help. This report can make tutoring sessions much more efficient and help students improve their understanding much faster.

You can also share the information from this report with student's parents to encourage more involvement. Remember, your license with Click and Learn allows students and parents to access our resources at home.

This report is a 'work in progress' because the report that you generate early in the school year will be much different from the report you generate later in the school year. As some questions drop off from this list (because students learn the material and answer questions correctly), others (more advanced questions) will be added to the list.

In order to best-prepare your students for the annual Major Tests, we suggest that you expose your students to all of the questions for your Grade/Topic at least 2 months before the test. This lets you Focus On the material that will give your school the best AYP/API scores.

Note: the accuracy of this report is limited by the fact that, with any multiple choice test, students should be able to score 25% with zero knowledge of the material. This is why we present similar questions on the same state standards several times with our bank of questions.
