

Click.and.Learn.Software

Click and Learn Testimonials

"Click and Learn is *Awesome*." 6th grade student, Bixby, Oklahoma

"Within 2 hours of my order, our teachers and students were using the Click and Learn software . . . my 6-year-old son learned names and locations of 28 states in less than 15 minutes." Oklahoma School Superintendent

"I would have not gotten an A without Click and Learn." College student during chance meeting inside the St. Louis Arch

"I learned the names and of the [49] countries of Africa in 20 minutes." School site technical coordinator, Lawton, Oklahoma

"[My 15-year-old daughter] has a disorder of the optic nerve which effects her visual memory. She pulls up visual information in pieces and gets lost. Your program with the color highlighting is wonderfully clear to her . . . I am so proud of her. Everything she does takes so much time and when I saw how quickly she can learn with the right and appropriate materials, I nearly cried." Mother of a student, Rhode Island

"My 8-year-old daughter learned the countries of South America in less than 15 minutes with your software." Sales agent from a "competitor", North Carolina

"This is Brilliant Software." Gifted and Talented Coordinator, Nowata, Oklahoma

"I learned the countries of South America in 10 minutes -- I haven't been able to do this in 42 years." Military chaplain stationed in Italy

Hey, Bob, I already told 3 of my friends [about your software] they were going to check it out and I'm planning on telling much more. I love your program so much it really works! Bye. :)" Email from Caroline (6th grader), Houston

"My daughter used your software for one evening before her test. I have to tell you, that program is great. She was addicted to it. She couldn't stop trying to finish the states in the time allowed. It really made learning a lot of fun, and made the process a lot easier for me. We definitely will use your programs in the future. Thanks again." Joanna (Mom) & Laura (Daughter)

"My friend Hanna and I are both using your software. I made an A+ on my test last week and so did Hannah. As a matter of fact, this morning before school, Hannah and I practiced very hard with your click and learn software, and we believe very strongly that we got A+ on the tests that we took today as well. Your software is extremely efficient, and we were as prepared as you can get for a test when we took it. Thank you very much!" Joanna, middle school student, Arkansas

"My seventh grade students learned all 49 countries of Africa in 70 minutes!" Chris Jones, Middle School Teacher, Pueblo, Colorado

"One of my students that had never passed a test the entire year made a perfect score on the latest test because of Click and Learn." Dale Allen, Middle School Science Teacher, Oklahoma

"Thanks for letting me use your software. I was the only one in my class to score 100% on our geography test." Sam Garner, age 11, Plano, Texas (friend of our salesman)

"Your product is fantastic. We have been home schooling for 7 years using a very demanding and time intensive curriculum . . . my daughter memorized the states in two days time. I'm thrilled!" Linda G., Virginia

"One of our second grade students took the CD home and learned all 49 countries of Africa in one evening." School Principal (name available on request), North of Pittsburgh, Pennsylvania

"Click and Learn helps the most when we are just trying to get to know something new, that we are not totally for sure about." Ashley Langley, 7th grader WRMS, Oklahoma

"Many thanks, I'm learning so much, so quickly now!!! You were right!" Anesthesiologist, Florida

"It is so easy that even an adult can use it. I am an 83 year-old grandmother and I learned more with Click and Learn in one month than with GeoSafari in a year." Virginia, a customer buying software for grandkids

"Even our students' parents love the software. We have some parents who come in to the school library during their lunch hour to use the software." Beverly Slocum, Gifted/Talented Coordinator, Ruston, Louisiana

"My (6-year-old) twins use my copy of the software at home. They like Click and Learn more than all of the products I sell." John, Sales Agent, Denver, Colorado

"Students like the software so much that they sneak into the computer lab to use it." Computer Lab Coordinator, Missouri

"When I walked by the computer lab I saw a 3rd grade student jump up and dance like he had scored a touchdown -- your software makes learning fun." Anita Williamson, Computer Systems Coordinator, Garden City, Kansas

"We will have 35 students receiving Highest Honors at our geography awards ceremony this week. That is much higher than ever before and it is all because of Click and Learn." Ed Grode, Principal, Perry Elementary School, Erie, Pennsylvania

"We have lots of math software at home. I like your math product because it is easy to use and my son learns quickly with it." Home school mom, New Mexico

"Students who have a hard time learning with traditional methods can easily learn with this software." Middle School Teacher, Southern Colorado

"I tell the school principals that they only need two things for Social Studies in their technology department: The Click and Learn software and access to the Internet." District Technology Coordinator, Kansas

"We do Click and Learn a lot of times. It is so fun! It really gets your brain to working." Andrew Marlow, 7th grader WRMS, Oklahoma

"I think Click and Learn was a really good program. I thought it helped me out a lot. I actually hate using a textbook but I love computers. If we had not done Click and Learn, I probably would get a failing grade. I have the program at my house on my computer; and sometimes, I go to it just for fun of Study." Jackie McCracken, 7th grader WRMS, Oklahoma

"Bob, when I asked my teachers to give me feedback I was overwhelmed with positive comments. They love your program. They said the kids really love it. They are using it too for math facts. The fifth grade teacher said her kids forgot their math facts so up to the lab she went and they did click and learn with math facts and the kids got right back on track." Principal, Catholic Elementary School, Oklahoma

"It only takes two minutes to show the students how to use the software -- then I can go back to my other tasks." Middle School Librarian, Miami, Oklahoma

"Your product is the brightest new star in the education market." Competing salesman's email after a trade show in Iowa

"The only thing we do differently is we use the Click and Learn software" Southeast Oklahoma Principal (at a principal's meeting) when asked why his students' geography scores are so much higher than scores from other schools

"My 3rd grade son uses the Click and Learn software at home to learn the 50 states. He Loves it!" Secretary to the Principal, Deer Creek Middle School, Edmond Oklahoma

"I have never seen software that was easier to use." Elementary School Principal, Catoosa, Oklahoma

"I must say that my school has learned a lot from your program. I find the program an easy and fun way to learn." Patrick M, 8th grader, Oklahoma City

"This is better than Zip Zap Map." Geography Club, fourth grader, Missouri

"We have a student who resists everything. When we got the Click and Learn software he asked me if he could work with it. I told him that he could not use the Click and Learn software until he had turned in his history report. He turned it in the next day. He is a smart student but he is stubborn." Middle School Teacher, Great Bend, Kansas

"Your software is "Teacher Wonderful!" I put my students on the computers and know that they won't be needing me for technical assistance." Fifth grade geography teacher, Erie, Pennsylvania

My son is ADD -- he loves working with the software at his own pace." Home school mother

My 5-year-old son can name all 50 states because of the Click and Learn Software." Dad in Oklahoma

"Our teachers are crazy about your software." Member of a textbook adoption committee, South Carolina

"I don't have kids at home so I loaned the evaluation copy of the software to a neighbor. Their 5th grade student shot up to the top of his geography class in just days." Middle school textbook adoption committee member, South Carolina

Stidham Public School
"Oklahoma's School Of The Future"
Bart Banfield – Superintendent

A Letter from an Oklahoma Superintendent

Dear Fellow Oklahoma Superintendents

My name is Bart Banfield and I am the Superintendent of Stidham Public School, which is located in the heart of McIntosh County, Oklahoma. I am writing you to share what I have found for Oklahoma State Standards Test Preparation. We are using software from Click and Learn Software company. This software, unlike most software on the market that is aligned to national objectives, is 100% aligned with the state of Oklahoma's PASS objectives.

Click and Learn is based in Oklahoma and Stidham School District has been utilizing their software for three years. During that time I have been impressed with the quality of the software and the professional attitude of the Click and Learn team. I have become friends with the Click and Learn team, but I am **NOT** a paid representative of Click and Learn. I am simply an Oklahoma school superintendent who cares about all students and who is under the same pressure that you are -- trying to get my students to perform as well as possible on the end of instruction tests.

The No Child Left Behind act has placed an emphasis on accountability. Every Oklahoma school will be given a school Report Card, A.P.I. score and told whether or not their school district made "Adequate Yearly Progress." The Click and Learn team understands this and they have worked tirelessly to put together software that is completely web-based, contains over 1000 skill builder games in subjects such as: Reading, Math, Science, History, Geography, Music, Early Childhood and so much more.

Click and Learn's newest component "State Standards" is brand new, so if you have seen a demonstration of Click and Learn in the past you probably have not seen it with the End of Instruction Oklahoma Test Preparation Package which includes over 100 Sample Tests for grades (3-12). All of these tests are web based, taken online at a computer by a student, and graded automatically by the computer.

I encourage you to go to their website at: <http://www.clickandlearn.cc/cc> and evaluate Click and Learn Software. Be sure to watch the video of how the Oklahoma State Standards component can help your school or just contact Kathy Reynolds, President of Curriculum Connections, Inc., by phone at (918) 473-7888 or (918) 441-8023. The Click and Learn team is truly interested in helping Oklahoma students and schools. When you contact them, be sure to ask about Click and Learn's remote control "clicker" component.

Yours in Education,

Bart Banfield

On April 17, 2007, Greg Hamilton, 7th grade teacher at Robertsville Middle School, Oak Ridge, TN, sent the following email to Bob Reynolds, President of Click and Learn Software:

Bob,

Just read your email so I thought I'd share what I do with Click and Learn at our school.

I first saw Click and Learn at the NCSS convention in 1997. A year or so after that, our school, Robertsville Middle, in Oak Ridge, Tennessee purchased a community site license for the software and have been using it ever since.

I use it some in the classroom, but my primary use is for preparing students for the National Geography Bee. I have made hundreds of tests with your program and our students who used them have been very successful at the state level. Our students have made the finals the past seven years, finishing first, second, third, fourth (3 times) and eighth.

I consider Click and Learn to be one of our "secret weapons" that few other Geography Bee contestants know about. It's the most efficient method I've found for helping kids learn large amounts of graphics-related information efficiently. Unlike the North Carolina educators you mentioned in your letter, I believe development of mental maps are the foundation for higher-level thinking skills and for cultural literacy.

Anyway, I just wanted to thank you for your product and let you know that at least one teacher out here considers it a vital tool in our instructional program.

TESTIMONIAL FROM A TEACHER IN THE OKLAHOMA PANHANDLE

April 18, 2007

Bob,

Just wanted you to let you know my 7th Grade Geography students just finished their OCCT. Since the test is online we know immediately how they did. Depending on where the state draws the passing line I might have 100% pass this year.

Out of 15 students 13 have definitely passed. One student who did not pass, has not passed my class all year. The other student has limited English. I'm keeping my fingers crossed that they will draw the line at 60%. If so all will pass.

I'm still using Click and Learn two days a week and textbook materials the other three days.

I was told at a Geography workshop that the kids didn't need to know all of the countries to know Geography. I strongly disagree. They need to know all of the countries to help them figure out the answers to questions.

Anyway, I'm so pleased with our test results and continue to be sold on Click and Learn.

Thanks for giving my students the opportunity to use it.

Linda Loyd
